

# Intratec Primary Commodity Prices

## Assessments Basis

The following tables present the basis of all the assessments covered in Intratec Primary Commodity Prices, grouped by industry. Each assessment is associated with a specific location and defined according to a price basis that includes a price type and Incoterm, as well as a sublocation, if pertinent. Moreover, the tables present the lag of each price assessment (i.e., the number of months during which the preliminary price of a commodity is provided, rather than its final price). Finally, for each industry, there is also a table dedicated to displaying specific notes associated with a given assessment, if applicable.

### Understand Intratec Primary Commodity Prices

To better understand this products and the methods used for developing assessments presented, please refer to the document "Intratec Primary Commodity Prices - Methodology" available at <https://intrat.ec/ipcp-methodology>.
